Windows 10 Web-SSO Instructions July 2018 Microsoft Edge

Note: The following instructions are for use with the Microsoft Edge Browser. For Instructions on connecting to WebSSO via Google Chrome, Firefox, or Internet Explorer, please see separate documentation for each browser.

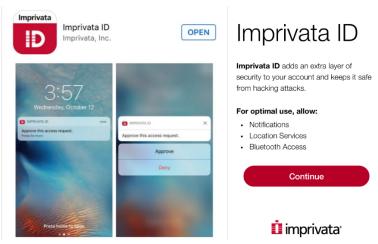

2. Type Intranet.lvh.com in the address bar and hit Enter. (Do not use www)

- 3. Sign in with your LVHN Credentials (SUI and Network Password)
- 4. If you haven't done so already, you will be prompted to sign up for two factor authentication. You may use Imprivata ID, an application available in the Google Play or Apple App store or by entering your 10 digit cell phone number. If you do not wish to use Imprivata ID, skip to step 9. and enter 5 to skip on screen now.

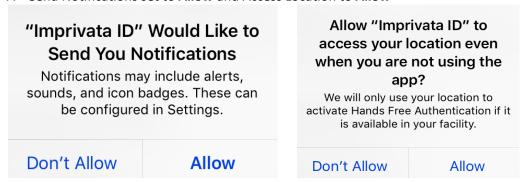

For Imprivata ID or SMS Text

5. To proceed with Imprivata ID enrollment, you will need to install the Imprivata ID app from the App Store (for iPhone) or Google Play Store (for Android devices)

Open the app and Continue.

7. Send Notifications set to **Allow** and Access Location to **Allow**

8. Enter the 12 digit Serial Number found in the Imprivata App on your smartphone (Starting with IMPR) Do not enter spaces. Press "Sign In"

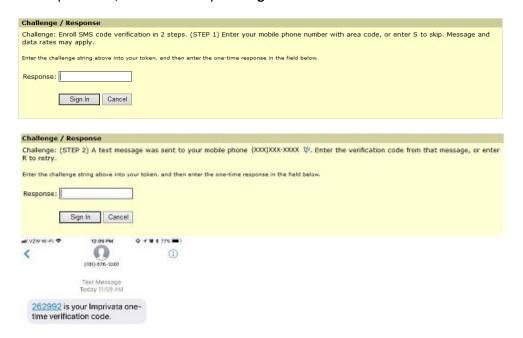

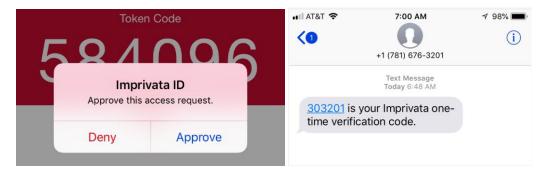

You will then be prompted to enter the 6 digit token code found on your cell phone. (There is a 30 second timer to enter this code before it refreshes to a new code) Press **Sign In**.

9. If you do not wish to enroll with Imprivata ID, this is the step you'll use. If you wish, you may also enroll a 10 digit cell phone for SMS text message verification (Both are not required, but at least one must be chosen) If only using Imprivata ID, enter a **S** to skip and **Sign In**.

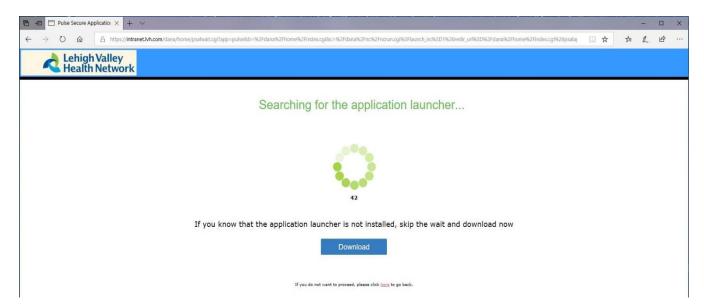

10. Every time you log into the portal from now on you will receive one of the following prompts on your cell phone. Simply press Approve to accept the connection request to the Intranet or if using SMS, enter the 6 digit token..

Installing Network Connect/Pulse Secure for Microsoft Edge browser

NOTE: For Instructions on connecting to WebSSO via Google Chrome, Firefox, or Internet Explorer, see separate documentation.

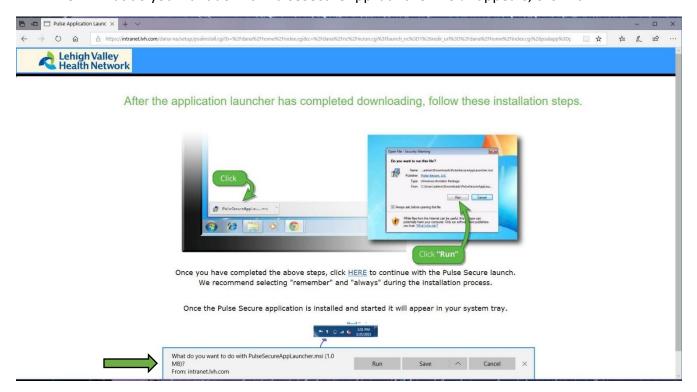

11. In Edge, Chrome, and Firefox browsers, you will see the following screen first where the program is searching for the Network Connect or Pulse Application Launcher. It requires this program for these browsers:

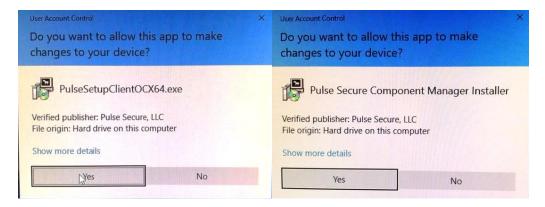

If it doesn't detect that the launcher is installed or you know it is not installed yet, choose

Download

12. When 'What do you want do with PulseSecureAppLauncher.msi?" appears, click Run.

13. You may be prompted a few times, "Do you want to allow this app to make changes to your device?" Please choose Yes.

14. After the Launcher installs successfully, follow the steps on screen that state, "click HERE to continue with the Pulse Secure launch."

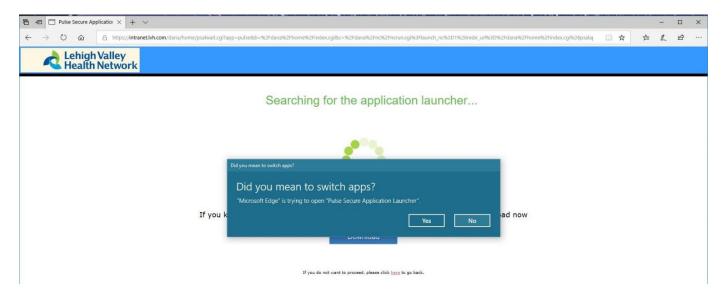

After the application launcher has completed downloading, follow these installation steps.

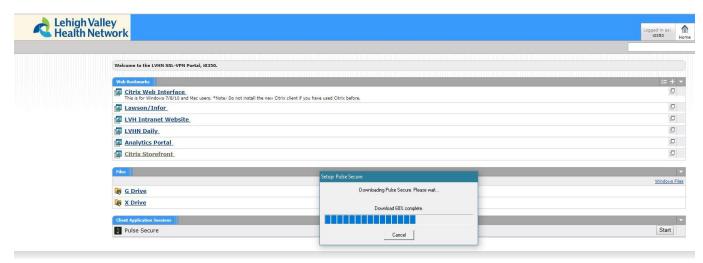

Once you have completed the above steps, click <u>HERE</u> to continue with the Pulse Secure launch. We recommend selecting "remember" and "always" during the installation process.

Once the Pulse Secure application is installed and started it will appear in your system tray.

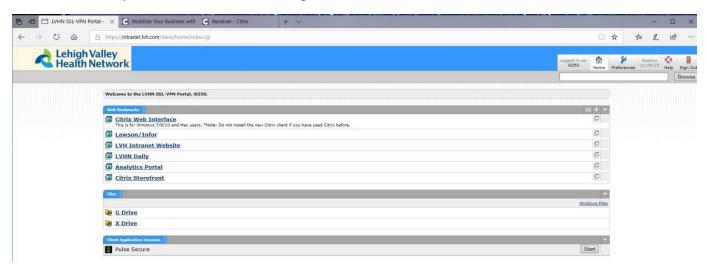

15. If you see the following prompt, "Did you mean to switch apps?" Choose Yes.

16. It will show Pulse/NC downloading and installing like below.

Once connected you should see the following on screen:

17. You can also tell you are connected to Juniper Network Connect by clicking the ^ at the bottom right of your screen called 'Show Hidden Icons'. The icon should look like below (Golden lock with green or grey circles blinking above it.) When hovered over, it should say 'CONNECTED'.

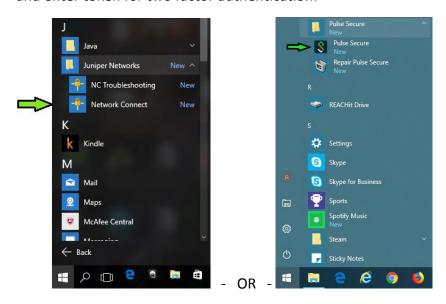

If you have Pulse Secure, it'll look like the following once connected:

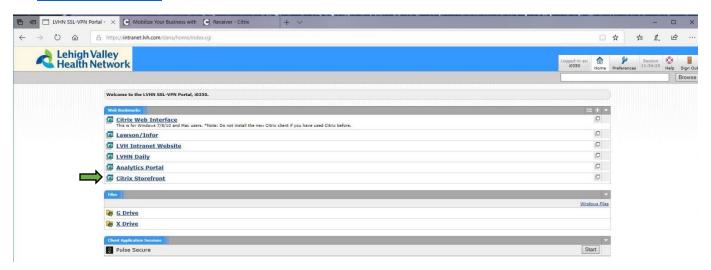

You can also reconnect to Juniper Network Connect or Pulse Secure by going to your Start Menu on the PC. See below:

Start Menu > Scroll to the letter J > Juniper Networks > Click on Icon called **Network Connect.** (For Pulse Secure: All Apps > P > **Pulse Secure**) If you weren't connected before, it will connect you now after you log in and enter token for two factor authentication.

18. Once fully connected, you will see the following, we will now be going to **Citrix Storefront** or **storefront.lvh.com.**

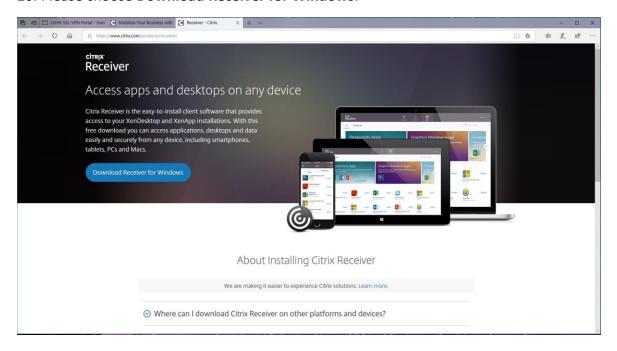

19. You will see the following screen after clicking Citrix Storefront.

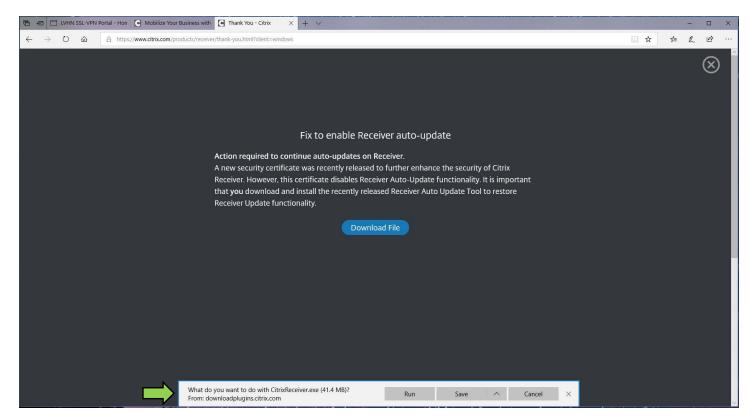

If you do not yet have a compatible version of Citrix Receiver installed, please visit https://www.citrix.com to install the latest version of Receiver for Windows.

20. Please choose **Download Receiver for Windows**.

Note: In Edge, the Citrix Receiver.exe file will appear at bottom. "What do you want to do with CitrixReceiver.exe? Choose **Run.**

21. The install for Receiver looks like the following. Press Start.

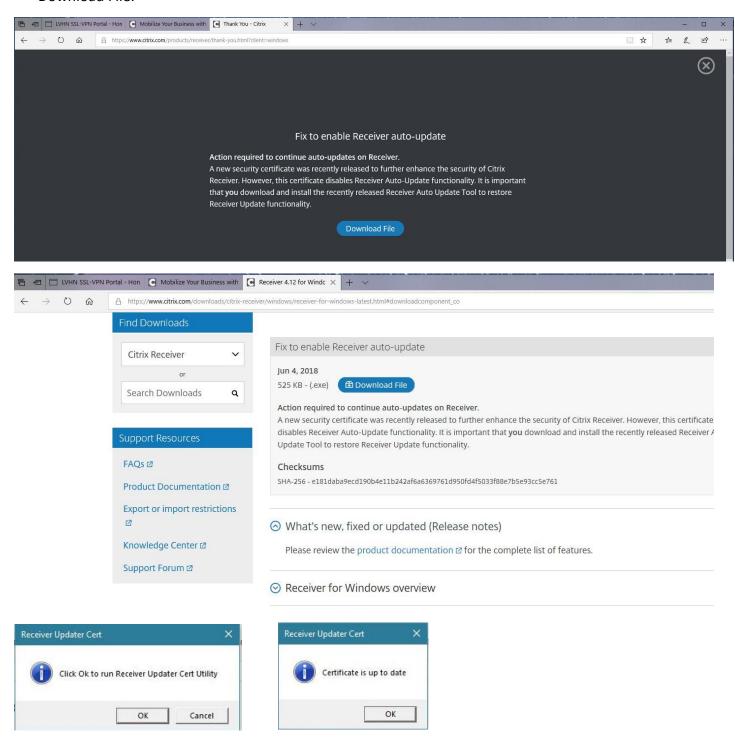

22. Choose 'I accept the license agreement.', then Install.

- 23. You may be prompted to allow the Citrix Receiver program to make changes to your PC. Please choose **Yes**. (Installation may take approximately 1-2 minutes or longer depending on machine.)
- 24. Once install is complete and you see the option for 'Add Account' or Finish. Choose Finish.

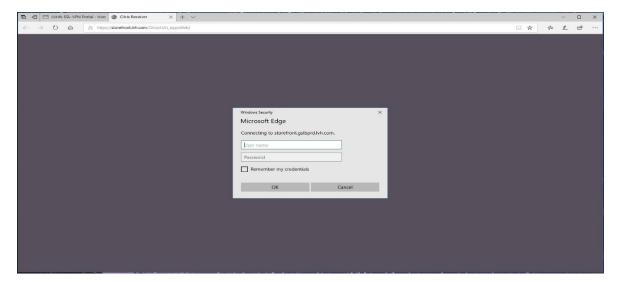

25. If you were prompted to install a 'Fix to enable Receiver auto-update', please do so now. Choose Download File.

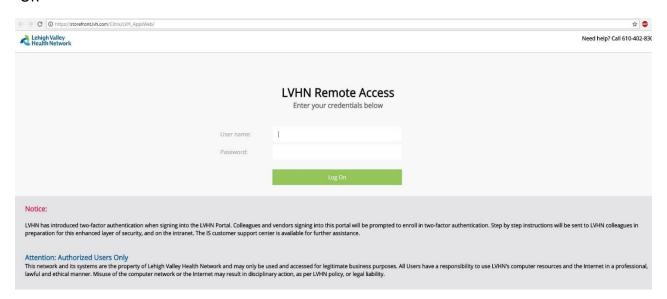

26. After installing Receiver and the Receiver fix update, please close any open browser windows and go to https://storefront.lvh.com if you are still connected to Network Connect or Pulse Secure. If your connection was lost, go back to intranet.lvh.com and sign in once more. Once connected, go back to Citrix Storefront, Choose Detect Receiver.

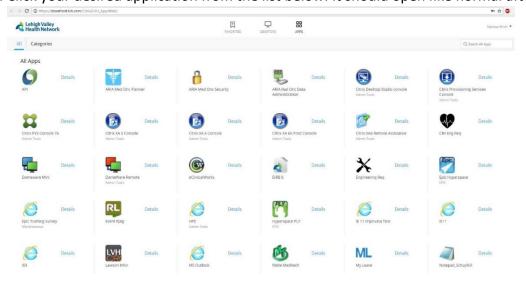

27. You may see one of the following screens – sign in with your LVHN SUI and password.

-OR-

28. Click your desired application from the list below. It should open like normal after a brief period

29. If this is your first time using Citrix on your workstation, you may see this pop up. Choose **Citrix Connection Manager** and "Always use this app to open .ica files. Choose **OK**.

You should see the following Starting... box then application will open in new window shortly.
